# WHY **LAW**

is the most awesome  
career choice for you?

For those who appreciate overcoming challenging puzzles and seemingly unattainable obstacles, law is the right academic career.

Lawyers have to deal with a wide range of ethical, intellectual, and moral issues. For some, the solution is self-evident.

The law provides financial security and work security. You will also build demonstrable critical thinking and decision-making skills as a law student.

You will also build demonstrable critical thinking and decision-making skills as a law student. You can use them to better your personal relationships, manage your finances, and so on.

“

**“If we desire respect  
for the law, we must  
first make the law  
respectable”.**

**Louis D. Brandeis**

# OUR FOCUS

is to provide you with extensive training to help you crack the CLAT and other allied exams such as the AILET (NLU – Delhi) | SET (Symbiosis) and LSAT, CLAT preparation.

OPUS

We have had the highest number of students cracking the **TOP 5**

# Our Course Content

## Learning *by Doing*

After 10 years of teaching students acing the CLAT, our top instructors pooled their knowledge to create this unparalleled collection of CLAT strategies and targeted content coverage. In each lesson you will learn by doing challenging problems.

## Think like a *Testmaker*

You will master the core CLAT content that is critical to success; and then start understanding how the authors of the CLAT take these content areas and question types and challenge even the most capable pre-Law school students.

## Clat Format & No of Questions

**28-32**

ENGLISH  
20% of the Paper.

**35-39**

**35-39**

CURRENT AFFAIRS  
25% of the paper

**28-32**

LOGICAL REASONING  
25% of the paper

**13-17**

QUANTITATIVE TECHNIQUES  
10% of the paper

# Content of CLAT

**English:** The English section on the CLAT will test a candidate's ability to competently comprehend complex reading material. It will also test a students' grasp of the English language in terms of complex grammar, logic and vocabulary in context.

**Quant:** This section tests a candidate's ability to use numbers and apply logic to arrive at a solution. Most questions on the CLAT are derived from what you should have learnt at the 8th to 10th standard in school.

**Legal Reasoning:** This section is the hallmark of the CLAT and will again test logic, but at a high level. The questions in this section are like advanced reading comprehension passages and will test your flair for analysing situations based on restrictions.

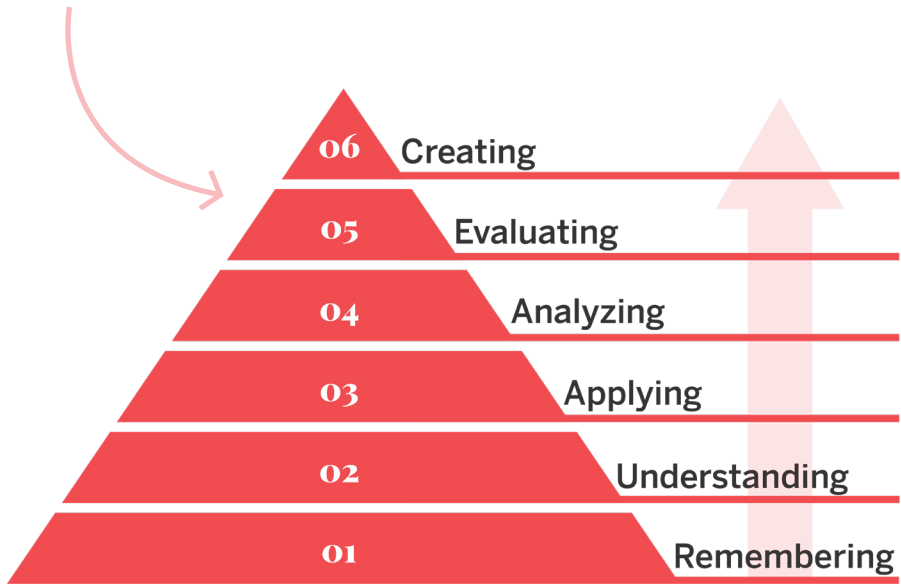

**Logic/Analytics:** The Reasoning section of the CLAT consists of 40 problems collectively designed to measure your ability to read critically, evaluate arguments, and recognize formal written English, identify series, formulate strategies.

**GK (Current Affairs and Legal GK):** This section focuses on a candidates awareness of his surroundings. Basically the current affairs section can be answered by anyone who reads the newspapers regularly.

# What does **CLAT** tests

## Bloom's Taxonomy of Educational Objectives:

- ▼ CLAT is designed to test the foundation of thought process up to the pinnacle as shown in the above pyramid
- ▼ Higher-order thinking," a stated aim of the CLAT authors and administrators, refers to the higher levels on the pyramid.
- ▼ The questions will test your understanding, your ability to apply, and in most cases your ability to analyze and create.

**Higher  
Order  
Thinking  
Skills!**

**CREATING**

**APPLYING**

**REMEMERING**

## THE OPUS PREP METHODOLOGY

### **CREATING**

#### **Think Like the Testmaker**

In this stage one understands how a problem has been made, what makes it hard, and how to break it down. When one thinks Like the Testmaker they can. Quickly recognize what the problem is actually asking, discover hidden information and manipulate it to make it useful and then recognize and see through trap answers, and. It finally helps one crack own plan of attack for any problem

### **APPLYING**

#### **Skills Meet Strategy**

On the CLAT, what you know is only as valuable as what you can do with that knowledge. The OPUS curriculum emphasizes learning through challenging problems so that you can learn how to combine skills and strategies to effectively solve any CLAT problem; most effectively utilize the classroom time and then stay focused and engaged, even after a long day at school.

### **REMEMBERING- Skillbuilder**

To succeed on the CLAT you must have a thorough mastery of content. For each content area, we have identified all core skills that simply require refreshing and/or memorizing and have put them in our Strategy Corner section. By doing this, students relearn core skills at their own pace, and those having solid command of the underlying content will not become disengaged because of a tedious review of material

# Course Structure

**Introduction:** The student's are exposed to the CLAT. The students also go through an expectation setting phase where we advise them on the most effective plan of action.

## 01

**Concept:** Each student will be exposed to Best-In-class instruction and a thorough review of concepts, skills and strategies that are so essential. Student's will receive specific content mentor books which will cover ALL concepts.

**Review:** Each concept tested is reviewed through a comprehensive series of class tests (100 + in number) and online assessment with detailed analytics (Over 5000 CLAT and higher level questions). Exposure to REAL CLAT questions through workshop.

## 03

**Testing:** After the Concept and Review phase, the student will be exposed to OPUS SIMULATED MOCK Tests (10) including special tests specific to NLU – D and Symbiosis Entrance Test. Further they will receive a test pack of another 10 MOCK TESTS which will help the students assess themselves.
